

SOP Assist: Redefining Access & Maintenance Intelligence

SOP Assist is a next-generation solution designed to streamline how organizations access, secure, and apply their internal, private knowledge.

By combining **Generative AI** with advanced attribution and filtering models, SOP Assist delivers accurate, context-aware answers—while honoring organizational rules, roles, and operational realities.

Key Capabilities

Policy Assist – For Employees

- ▶ Embeds **role-based access control (RBAC)** directly into knowledge at the time of indexing.
- ▶ Ensures employees only see what they're authorized to view—while signaling when restricted knowledge exists.
- ▶ Builds trust, improves compliance awareness, and reduces organizational risk.

Maintenance Assist – For Crews

- ▶ Delivers **step-by-step maintenance intelligence** in real-world operational contexts.
- ▶ Enriches knowledge with **geography, equipment age, maintenance history, remote asset state, and lifecycle stage**
- ▶ **Leverages Internal Expertise:** Provides guidance based solely on your proven internal wisdom, not unreliable public internet sources.
- ▶ Acts as a **co-pilot** for field crews, helping reduce downtime and boost efficiency.

The SOP Assist Advantage

- Bridges policy compliance and operational workflows.
- Equips employees and crews with trusted, actionable guidance.
- Scales across offices, shops, remote assets, and field operations

SOP Assist goes beyond being just another knowledge tool—it is a **strategic enabler of operational excellence**. By unifying compliance and maintenance intelligence on a secure, internal platform, it reduces costly errors, accelerates decision-making, and strengthens organizational resilience. Whether addressing corporate governance or equipment reliability, SOP Assist helps companies achieve more with less friction.

SOP Assist delivers clarity, compliance, and confidence—wherever work happens.
